

## Andrew Pearson's Signature Glass

**Vanities** is the newest addition to everything we have to offer. Some of the most sought after designers and publications have already used the glass offered in this exclusive program and now it is available through to the trade. The program will consist of eight types of glass in two styles;

### **FUZION and Mirrored Crackle Ice.**

**FUZION** glass architectural elements and surfaces are crafted one at a time. The process we use to fuse glass to glass yield a surface of uncommon depth and illusionary definition.

Natural inclusions and bubbles that are created in the process enhance the artisanal beauty of our glass. Glass, like stone, is one of the most durable and resilient natural surfaces. Our carefully defined heating and cooling processes increase the inherent hardness of our glass.

Andrew Pearson has developed fused glass technologies to create our line of thick glass architectural elements and surfaces in a production environment. With fine tuned processes in place, we launched our ultra-thick fused glass products for commercial and residential applications under the name **FUZION**.

The **Mirrored Crackle Ice** was first shown in Kip's Bay Decorator Show Home. Using the lamination procedure of bonding glass to glass in combination with another process we pioneered, we "crackle" the middle layer of tempered glass to create a remarkable illusion of broken glass, which remains completely safe to use in any application.

**C** | Kips Bay Offers a Colorful Answer to Décor Sameness

In Gil Walsh's powder room is a photograph of Jennifer Lopez, a Kips Bay Boys & Girls Club alumna, by Tony Duran. To date, the show house, now in its 44th year, has raised over \$20,000,000 for the club, which reaches more than 10,000 young people at 10 locations in the Bronx. Ms. Lopez was a member of the club's performing arts program. The walls are mica and cork; the artwork is by Nancy Lorenz. The mirror is Barbara Barry for Baker Furniture.

## **How To Buy Andrew Pearson Custom Glass:**

**When placing an order for Andrew Pearson Custom Glass there are a few key things to remember:**

- Convey to them that they need to know to add a MINIMUM of 1/2 inch to 1 inch of overhang to vanity.
- They need to decide on type of glass. If Fuzion you will need to be sure to choose a sub straight.
- Decide on vessel or sink and make sure to mark where the holes are on the template accordingly
- Make sure to mark the faucet placement in regards to the sink or vessel on your template
- Edge detail is important if you choose Fuzion. You have the options to choose flat or cove edge, mark order form accordingly.
- Be sure to mark which crackle color you are ordering and if choosing fusion be sure to select ultra clear vs. clear.
- If choosing Fuzion be sure to mark which texture you want.

**To download the template please visit [www.andrewpearson.com](http://www.andrewpearson.com).**

**If you have any questions please call or email us at [sales@andrewpearson.us](mailto:sales@andrewpearson.us) or call 1-800-969-2156.**

# Customer Specifications

Specify Desired Vanity Glass: \_\_\_\_\_

Specify Dimensions:

L (Overall Length) = \_\_\_\_\_

D (Overall Depth) = \_\_\_\_\_

L2 = \_\_\_\_\_

(Distance from left edge to center of sink) = \_\_\_\_\_

D2 = \_\_\_\_\_

(Distance from front edge to center of sink) = \_\_\_\_\_

Specify Edges (Flat Polished or Cove):

Edge 1: \_\_\_\_\_

Edge 2: \_\_\_\_\_

Edge 3: \_\_\_\_\_

Edge 4: \_\_\_\_\_

## Sink Shapes:

Circle

Elliptical

Rectangle

Square

Sink Brand: \_\_\_\_\_

Model Number: \_\_\_\_\_

Sink Condition (Under Mount or Drop-In): \_\_\_\_\_

Sink Shape: \_\_\_\_\_

Specify Dimensions (as indicated per diagram):

Circle: D = \_\_\_\_\_

Elliptical: Template must be provided.

Rectangle: X = \_\_\_\_\_ Y = \_\_\_\_\_ R = \_\_\_\_\_

Square: X = \_\_\_\_\_ Y = \_\_\_\_\_ R = \_\_\_\_\_

Number of faucet holes: \_\_\_\_\_

Faucet hole location:

Is faucet 'centered-up' on sink? \_\_\_\_\_

Specify Faucet Dimensions (as indicated per diagram):

F = \_\_\_\_\_

(Distance from back of sink cutout to center of faucet hole.)

G = \_\_\_\_\_

(Distance from center of hole to center of hole.)

D = \_\_\_\_\_

(Diameter of faucet holes.)
